

INVITATION

ZOLLER
expect great measures®

Workshop

June 21st, 2016
East Hartford, CT

Process-reliable and Economical Production
with ZOLLER and NCSIMUL MACHINE

Would you like to bring out the maximum in your tools and maximize the efficiency of your CNC machines?

The new interface between ZOLLER TMS Tool Management Solutions and NCSIMUL MACHINE from SPRING Technologies enables you to transfer tool data from ZOLLER Tool Management into NCSIMUL MACHINE in a fast and process-reliable manner.

We will show you how to scan a tool with its real contours in a matter of seconds at the ZOLLER tool presetter and measuring machine. The scan is then available as 3D contour for NCSIMUL MACHINE. In this way, you are able to simulate and optimize your machine program based on real tool data.

You reduce positioning and machining time and increase tool and machine life — see for yourself!

The workshop is free of charge but participant numbers are limited. Register at:

www.zoller.info/usa/event/197

Don't miss out on this opportunity!

AGENDA

9:30 a.m. Welcome and introduction of ZOLLER and SPRING Technologies
9:45 a.m. ZOLLER tool management live!
10:15 a.m. Introduction of NCSIMUL MACHINE
10:30 a.m. Live 3D scan of tool
11:00 a.m. Live simulation with real data and automatic optimization
11:30 a.m. Expert Q&A: questions, experience exchange, tips & tricks
12:00 p.m. Lunch
1:00 p.m. End of workshop and time for individual questions
