Sensofar announces Connecticut Center for Advanced Technology (CCAT) partnership in the US

Sensofar commitment to the US's industrial sector

Sensofar Group, a high-end surface metrology instrument designer and manufacturer, [today announced](#) its partnership with the Connecticut Center for Advanced Technology (CCAT), a premier manufacturing technology provider that has engaged the manufacturing sector throughout Connecticut, New England, and the U.S. for nearly two decades.

Since 2004, CCAT has served to strengthen the global competitiveness of the advanced manufacturing ecosystem as an applied technology demonstration and training center, assisting companies with the validation, demonstration, and adoption of leading-edge technologies within its core focus areas: advanced design, automation, metrology, and additive technologies.

CCAT is known nationally for applying innovative technology solutions and developing strategies focused on the most important challenges confronting manufacturers, e.g., Industry 4.0 readiness and incumbent worker training.

With both CCAT and Sensofar having interests in pursuing advanced manufacturing and surface metrology, we'll be working closely together to innovate future technologies alongside industry, supply chain companies, federal and state entities, and academia.

Adam M. Platteis USA Sales Manager said: *"It's a fantastic opportunity for Sensofar to partner with CCAT. We are excited to provide metrology equipment for industry in the US. The company's brand and recognition will undoubtedly be strengthened thanks to this relationship moving forward."*

Dr. Jackie Garofano, Chief Technology Officer, CCAT shares: *"Adding Sensofar's S neox 3D optical, non-contact profilometer to our metrology capabilities allows us to showcase and demonstrate this class-leading areal measurement system to our customers and collaborators across all markets: advanced manufacturing, electronics, medical device, aerospace, defense, automotive, etc. Developing strategic partnerships with technology leaders like Sensofar enables CCAT to deliver the greatest value to the manufacturing supply chain – increasing efficiency and competitiveness in a global market."*

SENSOFAR

Sensofar, also provide consultancy within the field of metrology, and pursues a philosophy of guaranteeing advanced techniques, high-end systems & and high-quality software with the best customer service support.

About CCAT

The Connecticut Center for Advanced Technology (CCAT) is a premier manufacturing technology provider equipped with the most advanced assets to support its core focus areas: advanced design, automation, metrology, and additive / hybrid manufacturing of materials (metals, polymers, and fiber reinforced composites). As a 501c3 organization, CCAT collaborates with large and small technology companies across multiple industries, including Fortune 500 corporations, industrial supply chain companies, federal and state entities, and academia to deliver technical solutions to complex challenges. For more information on CCAT and its programs, visit www.ccat.us

About Sensofar

Sensofar-Tech, SL (marketed name Sensofar Metrology) is a leading-edge technology company that has the highest quality standards within the field of surface metrology. Sensofar Metrology provides high-accuracy non-contact 3D surface metrology systems based on confocal, interferometry and focus variation techniques.

The product portfolio includes standard setups for R&D and quality inspection laboratories and compact in-line non-contact metrology solutions for production processes. Sensofar Metrology offers technology that enables our customers to achieve real breakthroughs, particularly in the semiconductor, precision optics, data storage, display devices, thick and thin film and material testing technology fields.

Sensofar Group headquarters are located close to Barcelona, also known as a technology and innovation hub in Europe. The Group is represented in over 30 countries through a global network of partners and has its own offices in Asia, the United States and Germany.
